Professional Summary

Cloud and Data Engineer with 2+ years of experience designing, developing, testing, and maintaining scalable data pipelines and cloud-native data integration solutions. Skilled in Python, SQL, ETL/ELT, Apache Airflow (Cloud Composer), Talend, and GCP services including BigQuery, Cloud Storage, Dataflow, Pub/Sub, Cloud Functions, Bigtable, and Datastore. Experienced in API-based data integration, data migration, data validation, workflow orchestration, data warehousing, and end-to-end data delivery to downstream applications. Strong understanding of enterprise data pipelines, batch processing, monitoring, error handling, and production support.

Skills

Programming: Python, SQL
Cloud: GCP, BigQuery, Cloud Storage, Dataflow, Pub/Sub, Cloud Functions, Cloud Composer, Cloud SQL, Cloud Datastore, Bigtable
Data Engineering: ETL/ELT, Data Warehousing, Data Modeling, Data Integration, REST APIs, API Integration, Batch Processing, Data Migration, Data Validation
Big Data & Orchestration: Apache Spark, Dataproc, Apache Airflow, DAG Development, Workflow Orchestration
Databases & Tools: PostgreSQL, Oracle, MySQL, Talend, Git, SourceTree, Linux, CI/CD

Professional Experience

Data Engineer
Accenture
Tech Stack: Python, SQL, Apache Airflow (Cloud Composer), Talend, BigQuery, Cloud Storage, Dataflow, Pub/Sub, Cloud Functions, Bigtable, GCP

- Developed, tested, and maintained scalable cloud-native data pipelines on GCP to support enterprise data integration, data processing, and analytics requirements.
- Designed and enhanced Apache Airflow (Cloud Composer) DAGs to automate ETL/ELT workflows, schedule data processing jobs, manage dependencies, and improve operational efficiency.
- Built automated data ingestion and transformation workflows using BigQuery, Cloud Storage, Pub/Sub, Dataflow, and Cloud Functions for reliable processing of enterprise data.
- Developed API-based data ingestion pipelines to integrate external systems with GCP, handling API requests, JSON responses, data extraction, and integration into cloud-based data pipelines.
- Migrated legacy Talend-based data integration processes to cloud-native GCP solutions, improving scalability, maintainability, and integration with modern cloud data services.
- Performed source-to-target data mapping, data validation, transformation, and reconciliation to ensure data quality and consistency during migration and integration activities.
- Supported end-to-end data flows from source systems through Dataflow, BigQuery, Bigtable, and Cloud Functions to downstream applications, IVR, CRM, and web portals.
- Worked with BigQuery for data storage, querying, transformation, and analytics workloads while supporting reliable and scalable data warehouse solutions.
- Implemented monitoring, error handling, logging, and troubleshooting mechanisms to identify pipeline failures, resolve data issues, and improve production reliability.
- Collaborated with cross-functional teams to understand business requirements, design data workflows, troubleshoot production issues, and deliver business-critical analytics and data integration solutions.

Sep 2024 – Present
Bengaluru, India

Certifications

Google Cloud Professional Data Engineer	2025
Google Cloud Professional Cloud Architect	2025
Google Cloud Associate Cloud Engineer	2025
Google Cloud Data Practitioner	2025
Google Cloud Generative AI Leader	2025
Microsoft GitHub Advanced Security	2025
Microsoft GitHub Copilot	2025

Education

Bachelor of Computer Science and Information Technology	2020 – 2024
Reva University, Bengaluru	CGPA: 8.95
