Professional Summary

Cloud and Data Engineer with 2+ years of experience designing, developing, and optimizing scalable cloud-native data pipelines. Skilled in ETL/ELT development, Apache Airflow (Cloud Composer), Talend, and Google Cloud Platform (GCP) services including BigQuery, Cloud Storage, Pub/Sub, and Cloud Functions. Experienced in workflow orchestration, data integration, cloud migration, and data warehousing, with a proven ability to improve pipeline performance, automate processes, and deliver reliable data solutions. Strong foundation in data analytics, cloud technologies, and large-scale data processing.

Skills

Programming: Python, SQL, Java
Cloud: GCP, BigQuery, Cloud Storage, Pub/Sub, Cloud Functions, Cloud Composer, Cloud SQL
Data Engineering: ETL/ELT, Data Warehousing, Data Modeling, Data Integration, Batch Processing
Big Data & Orchestration: Apache Spark, Dataproc, Apache Airflow, DAG Development
Databases & Tools: PostgreSQL, Oracle, MySQL, Talend, Git, Linux, CI/CD

Professional Experience

Data Engineer Sep 2024 – Present
Accenture Bengaluru, India

Tech Stack: Python, Apache Airflow (Cloud Composer), Talend, BigQuery, Cloud Storage, Pub/Sub, Cloud Functions, SQL, GCP

- Developed, tested, and maintained scalable cloud-native data pipelines on GCP to support enterprise data integration and analytics.
- Designed and enhanced Apache Airflow (Cloud Composer) DAGs to automate ETL/ELT workflows and improve operational efficiency. Built automated data ingestion and transformation workflows using BigQuery, Cloud Storage, Pub/Sub, and Cloud Functions.
- Migrated legacy Talend-based data integration processes to cloud-native GCP solutions, improving scalability and maintainability. Collaborated with cross-functional teams to design data workflows and deliver business-critical analytics solutions.
- Implemented monitoring, error handling, and performance optimization techniques to improve pipeline reliability and reduce operational overhead.
